

Sentiment Based Product Recommendation System

- This is request document to let you know that the apps which we deployed in Heroku platform might not be working by the time the Evaluation happens on our Projects. This is so because Heroku is stopping its free provision of app deployments from 28th Nov and it's requesting to go for a paid plan to keep our apps running.
- Here's a screenshot of the notifications that are popping up in Heroku regarding this paid account update:

So, it's a request that project evaluation to be done based on the codebase in the git repo and screenshots I attached here.

- Git repo link: <https://github.com/praneethkumar4/SBPRecommendationSystem>

- Also, I'm attaching few screenshots which demonstrates the working of the deployed app before Heroku stops supporting
